Minimum Viable Product

Demonstrations, Monday, Nov. 7th, class time
MVP – Next Monday, Nov. 7th

• 10 minutes per team
• Focus on (current and planned) **value for your intended user base**
  • Make clear who the intended user base is (user analysis)
  • How do they currently do the task you plan to support (task analysis)
  • What are your first bits of functionality and/or designs - demo!
• This presentation **does not** focus on technology, architecture, tools, etc.!
• No problem if you haven’t gotten to real implementation yet – demo sketches / wireframes / mockups instead...
• Use the materials from your PRDv1.0 that are implementation independent!
