CS189A Demo and Presentation

- **Friday, Dec. 1st by noon:** PRDv2 due via email PDF
- **Monday, Dec 4th during class**
  - SmartNet, FKA Citrix, V&R, CashFlow, SchruteFarms, Not Our SegFault
- **Wednesday, Dec 6th during class**
  - MatchFolio, Worthday, Perception, Game of Drones, Bob's Builders
- **Thursday, Dec 7th Discussion**
  - No discussion section – meet in the classroom if you like
  - Sprint 4 retro and plan for holiday break
- We will record/post the presentations
- Arrive ahead of time (don’t be late)
- **10 minutes max** with 1-2 minutes for questions
  - Recommendation: Intro slide followed by 5 slides, 1 slide per team member
- Introduce everyone, everyone should say **something**
  - Prob./motivation, solution design, technologies/current status, prototype demo
- Test the projector/setup in the classroom **today**
- Practice, practice, practice
- Consider the judging criteria
Capstone Award Judging Criteria

- **Science**: Has the project demonstrated the application of important, interesting, or new aspects of Computer Science? (e.g. Use of machine learning, non-trivial algorithms, solid distributed system design techniques)

- **Practice**: Did the project adhere to techniques that represent the state of best practice in industry throughout the development of the system (e.g. repo workflows, Test-driven development, issue tracking, or use of static or dynamic analysis tools)

- **Scope**: Has the team attacked a problem of significant (but appropriate) scale and complexity. Does the problem require the development of significant new code and/or the integration of complex exciting parts that are not normally made to interface to one another? Was the project able to complete the goals that it set for itself?

- **Teamwork and Presentation**: Do all the members of the team contribute significantly (in their own ways)? Does the team take the process seriously and communicate effectively with one another and the mentors? Is the project presented both in written and spoken form in a way that is compelling and impressive? Has the team developed an impressive demo?
