Today

• Activity: Scrum/Standup (15mins)
  • Plan for update (details below)

• Progress/feedback

• Plan for rest of quarter

• Activity:
  • Team lead presents progress
    • State company and team name
    • Problem being solved
    • How you are solving it?
    • What is the team’s test process?
    • Challenges/blockers to hitting demo in 2 weeks
  • Each member: one task from this sprint and 2 acceptance test cases for it
Progress/Feedback

• Good start for all teams on PRDv1
  • Use all of the feedback you received to improve your PRDv2 due Nov 29 (@section)

• Progress has been steadily improving
  • Now all team members should be committing code/tests to repo
    • Testing and having a test plan is required in Sprint 4 for all tasks
    • Each team member should have clearly delineated tasks (reduce overlap!)
  • Don’t solve the problem perfectly, just get it to work then improve on it in next sprint
  • Use cases/stories should be increasingly detailed with acceptance tests and prioritized for use in this (sprint 3) and last (sprint 4) sprints
    • Trello must reflect use cases/stories (with tasks broken down in body) or individual tasks
    • Many teams lacking clear sprint backlog and burndown chart (will be included in grade for Sprint 4)
  • Your timing estimates should be becoming more accurate (reflect on this at end of sprint 3)

• Plan to have a working demo (lite on features is OK) for Dec 3 presentation (2 weeks)
• Projects are all looking very interesting; rate of progress should be increasing
Plan for Rest of Quarter

• Today:
  • Demo plan/advice
  • Class wide progress report by each team
  • TA meetings
  • Work on improving use cases/stories for features/support in this/next sprint backlog (add to PRDv2)

• No discussion this week (Happy Thanksgiving!)

• Next Monday
  • Sprint 3 retro
  • Sprint 4 planning
  • Outline demo/presentation
  • Test that your laptop works with the classroom projector!

• Next Thursday
  • Finish PRDv2 and turn in via email as PDF by end of section
  • Scrum/Sprint 4 work

• Monday, Dec 3: Recorded team presentations
• Thursday, Dec 6: Sprint 4 retro; holiday break work planning
• No final
Demo Presentation Instructions/Preparation

• Presentations in Monday, Dec 3 class period; worth a significant portion of grade
  • Order of teams is on the class schedule website
  • 8 mins max (points for getting the timing right!)
  • Laptop must work! Points deducted if it doesn’t, so test in advance (next Monday)
  • Will be recorded and shared with Prof. Bultan (CS189B)

• Outline (~1 slide each) – all members of team should speak
  • Introduce team and give team name and company
  • Introduce the problem
  • Overview and demo how you solve it: use pictures, demo recording OK
  • Provide some technical details, novelty and challenges (2 slides max)
  • Next steps (plan for what is left / CS189B)
Advice

• Practice, practice, practice, practice, practice, practice, practice, practice, practice, …
  • Time yourselves to that you get as close to 8 minutes as possible without going over
• Test that your laptop works; have a backup laptop and usb w/presentation
• Live demo OK but record it also so that you have a fallback

• CS189A presentation is not anything like what your final presentation (CS189B) will be like. Different format, duration, level of preparation, purpose
  • Purpose: state clearly your problem/solution and innovation
    • As a hand off to Prof. Bultan; not open to the public
• CS189B – identify/implement advanced features, get feedback from users/others, extensively test (make it bulletproof!), public presentation & demo prep
