*Browsing for housing.*

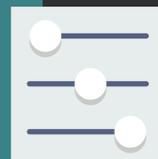

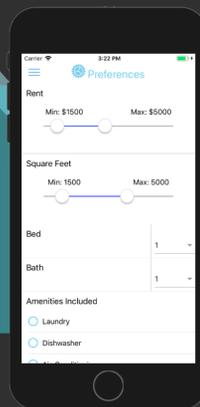

1 Sign up and log in to the user profile

2 Fill out the background check and rental application

3 Filter properties based on your preferences

4 ... and MatchFolio pulls all properties that you are eligible for!

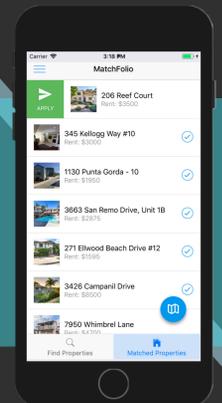

## Impact

MatchFolio helps:

- Prospective Tenants - **MatchFolio** streamlines the application process making it easier to find places to live.
- Property Managers - **MatchFolio** gives property managers an innovative method of property advertisement.

5 Match properties and move in happy!

## Problem

Lease finding has never been an easy task. The process involves sifting through endless listings offered by a multitude of property management companies, filling out lengthy, redundant applications, paying pricy application fees, and going through background checks (which cost money as well).

## Solution

**MatchFolio** is a mobile application that seeks to eliminate the issues that accompany lease hunting with:

- Reusable applications and background checks
- One time application fee
- Intuitive, streamlined interface
- Properties available from all of AppFolio's property managers
