Problems

- Students often stress out about their financials.
- Traditional payment systems are old and complicated.
- Students have to use too many disparate systems in order to track what they spend.

(PayPal, Venmo, Bank Account, Mint, Apple Pay, BARC, etc.)

Solution

- Unified platform that handles all aspects of student finance.
- Our system includes NFC Payments, Tap to Transfer, Third Party Websites Payments and Budgeting Tools.

Tech Used

- NodeJS
- React
- MongoDB
- ExpressJS
- TensorFlow
- Django
- Android SDK
- Heroku
- NFC
- Slack
- Trello
- Github
- Circle CI
- Jest
- Python
- Tornado
- NumPy
- Pandas
- Flask
- Django
- TensorFlow
- Machine Learning Tagger
- OAuth2.0
- JWT
- Balance
- School Charges
- Tap to Transfer
- Budget & Alerts
- Analytics & Exports
- Third Party Websites
- Home & Settings
