The problem

- Complicated Terminology
- Hard to follow along / lost in details
- No historical transcript
- Lack of automatically generated post visit summaries
Goal

Problems:

Hard to follow along--->

Complicated Terminology--->

Lack of Post Visit Summaries--->

Solutions:

Real-time transcription

Real-time medical comprehension & explanation

Generation of Post Analytical report
Overview & Demo
Technical Details/Challenges
Next steps

- **Additional features**
  - Generation of patient’s visit summary
  - Multilingual user interface
  - Reminding patient’s medical history

- **Improvements and Optimization**
  - Extraction of repeated words
  - Extraction of high frequent terminology

- **User Interface Polishing**

- **Testing**
Thank you!
