Communicate

- Patients don't understand complex medical terms
- Patients and Doctors want to track past appointment records easily

Solution

Use NLP to analyze the conversation in real-time:

- Users can check the definitions by clicking on complex medical terms.
- Users can review their post-visit summary.

Innovation

How Alpha Health differs from other Telehealth solutions:

- Transcribe and Comprehend conversation in real-time for patients
- Generates the post visit summary automatically for doctors

Motivation

- Patients don't understand complex medical terms
- Patients and Doctors want to track past appointment records easily
